

**OBJECT ORIENTED PROGRAMING LAB****Experiment No.: 8****Name : Swetha Prakash****Roll No : 46****Batch : B****Date : 22-04-22****Aim**

Write a program to Perform string manipulations.

**Source Code**

```
public class StrManipulation {  
    public static void main(String[] args) {  
        String string1 = "Hello";  
        String string2 = "welcome";  
        String string3 = string1.toLowerCase();  
        String string4 = string2.toLowerCase();  
        int i = string3.compareTo(string4);  
        if(i==0){  
            System.out.println("Both strings are equal.");  
        }  
        else{  
            System.out.print("Strings are not equal.");  
        }  
    }  
}
```

## **Output Screenshot**

A screenshot of a command prompt window with a black background and white text. The text shows a command being executed and the resulting error message.

```
D:\Swetha>java StrManipulation  
Strings are not equal.
```
